

Amazon Firestick

Casting to an Amazon Firestick is available for Android devices with Android OS 4.2 (Jelly Bean) or later and select Windows devices.

Apple iOS and macOS do not support casting to Firestick.

To cast to an Amazon Firestick:

1. Press and hold down the Home Button on your Firestick remote.
2. When a menu appears on your screen, navigate to the “Mirroring” icon, and click on it.

Note: If mirroring is not working, make sure your device and your Firestick are within 30 feet (10 meters) of each other and connected to the same WiFi network.

Alternatively, you can use a Firestick browser app like Mozilla Firefox or Amazon Silk by navigating directly to our home page

www.caroentertainment.com and viewing your show.

Apple TV

If you own a mobile Apple device with iOS 11 or later, you can mirror your screen to an Apple TV (or a supported device with Apple TV built in).

1. Turn on the Apple TV or device with Apple TV built in, and ensure it is on the same wifi network as your iOS device.
2. Open Control Center on your iOS device.
 - a. For the iPhone X or later or iPad with iPadOS 13 or later: Swipe down from the upper-right corner of the screen.
 - b. For the iPhone 8 or earlier or iOS 11 or earlier: Swipe up from the bottom edge of the screen.
3. Tap on the “screen mirroring” option.
4. Select the supported Apple TV device you’d like to mirror to.
5. Look for the four-digit code on your supported Apple TV device, and enter this code on your iOS device.
6. Your TV will reflect the same screen orientation and aspect ratio as your iOS device. You will also be able to adjust the volume from your iOS device.
7. When you want to stop mirroring your iOS device, open Control Center and tap Screen Mirroring. Then tap Stop Mirroring.
